

Vision

Your school's vision for digital learning is clearly articulated, visible and consistently evident across the school.

Partnerships

There are clearly defined pathways and processes for engaging and growing strong community partnerships with digital learning within your school.

Culture and Values

Your school has a culture of innovation, values a growth mindset and your people are encouraged and supported to trial new approaches and methods of learning and operating.

Environment

You have the necessary resources, devices, tools and learning spaces for effective and purposeful digital learning to take place.

Team

You have a team of people who lead digital learning across the school with clear roles and responsibilities.

Students

Your students are actively engaged and enthusiastic about digital learning and have the skills and understanding to be highly digitally fluent.

Professional Learning

There is a clear plan for professional learning that helps everyone progress towards the digital learning vision and develop digital fluency over time.

Finances

Your leadership team have a sustainable financial plan that provides the tools, infrastructure and access you need for effective digital learning

Curriculum

Your teachers have the curriculum tools, understanding and ability to design learning that integrates New Zealand digital technologies into their weekly programs.

Measurement

You have the processes and tools to help you measure and evaluate the impact of digital learning on both the students' and the teachers' progress with digital efficacy.
